

# TUMBLE

**For 2 to 4 players  
Ages 6 and up.**

## Instructions

### Object:

When all the marbles have tumbled to the bottom, to be the player with the least amount!

### Contents:

Tumble unit made up of 4 sections (base, bottom, center and top), plastic sticks, marbles.

### Set Up:

Remove the 4 pieces that make up the Tumble unit. Looking at the package back for reference: Place the base on the table so that the four ridges (around the circular opening) are pointed up. Place the bottom securely into the center of the base. Hold the bottom with one hand as you attach the center (the section with all the holes in it) to it. The tabs of the center should be facing down: each tab gets inserted behind a slot. The two ends of this section will meet in one corner. Finally place the top onto the unit (the big opening facing up) by placing each slot around a tab below it.

Now insert all of the plastic sticks into the center section so that they go from one side through to the other. Insert them from all four sides--the number of sticks does not have to be the same on all sides.

Put all of the marbles into the Tumble unit from the top. If any marbles fall all the way through, put them back in from the top.

### Playing:

Each player sits near one of the four corners of the game base. Notice that each of you has your own shape. There's a circle, triangle, square and star. The youngest player starts the game and then turns move to the left. The first thing to do on your

turn is to turn the Tumble unit until the opening on the bottom is at your shape/corner. Now pull out ANY plastic stick. If any marbles fall, they will come out into your corner. Keep all marbles that fall in your corner there until the end of the game.

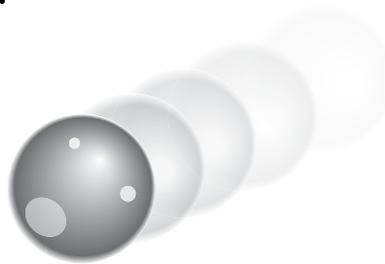

The player to the left now moves the opening over to their corner and takes their turn.

### **Ending and Winning the Game:**

Play continues until all of the marbles have fallen! Players count up all the marbles that landed in their corner and the player with the least amount wins!
