# Hints and tips for fun ways to play

## For younger children learning the alphabet

- Start off with just a few puzzle pieces at first and slowly work up to the full alphabet as their ability and confidence grows.
  - Children love to show how observant they are by placing the puzzle pieces one by one on the puzzle pictures shown on the poster.
- TIP:** lay the poster on a flat surface to avoid tearing.

## When children know the alphabet well

- As younger children really get to grips with their alphabet why not use the number and picture cards separately as 'flash' cards to play a guessing game.

- Lay the puzzle pieces face down on the table and take it in turns to turn over two picture cards and two letter cards to play a memory and matching game. Non-matching cards are turned face down at the end of each turn and matching cards are removed from the game. The winner is the person with the most matching cards – watch out, children get really good at this!

## As they grow

- The height chart on the back of the puzzle poster is a fun way for children to see how much they've grown. **TIP:** mark their height, and the date, every three months or so - children love being able to see the changes.
