## Hints and tips for fun ways to play

#### For younger children just learning to count

- Start off with just a few puzzle pieces at first and slowly work up to the number twenty as their ability and confidence grows.
- Children love to show how observant they are by placing the puzzle pieces one by one on the puzzle pictures shown on the poster.

**TIP:** lay the poster on a flat surface to avoid tearing.

#### When children know numbers well

 As younger children really get to grips with counting and numbers why not use the number and picture cards separately as 'flash' cards to play a guessing game. Lay the puzzle pieces face down on the table and take it in turns to turn over two picture cards and two number cards to play a memory and matching game. Non-matching cards are turned face down at the end of each turn and matching cards are removed from the game. The winner is the person with the most matching cards - watch out, children get really good at this!

#### As they grow

 The height chart on the back of the puzzle poster is a fun way for children to see how much they've grown.

**TIP:** mark their height, and the date, every three months or so - children love being able to see the changes.
