

 **WARNING:**
CHOKING HAZARD – Toy contains small balls
and small parts.
Not for children under 3 years.

**For 1 to 6 players,
Ages 5 and up**

Object:

Be the last player left after all the other players have made the balls spill.

Contents:

Game tower, clear cylinder, 102 balls, color game die, number game die, 6 cue sticks, plastic wall.

Set Up:

- Remove the green cap from the clear cover. Remove the cue sticks, numbered die, color die and rolled plastic wall. Leave spare balls in the tube.
- Unroll the plastic wall and lock the tabs into place around the tower to contain any falling balls.

You can also place the game in a tray or low-sided box.

- Place WobBally on a hard, level surface.
- Hold the base section and turn the cover clockwise until the ball bearing in the center ring rests in the center.
- Still holding the base, twist the cover counter-clockwise to unlock from the base. Lift the cover away from the balls.

Playing:

There are three ways to play WobBally:

1. Each player rolls the numbered die and the player with the highest roll goes first. Play moves clockwise. Use a cue stick to tap any ball into the center of the tower. When a player makes the tower collapse, that player is out of the game. Rebuild the tower and continue playing until there is one winner left.

2. Each player rolls the numbered die and the player with the highest roll goes first. Play moves clockwise. On your turn, throw the colored die to see what color ball you must tap into the center of the tower. If no balls of that color are in the tower,

play passes to the next player. Winning is the same as above.

3. Each player rolls the number die and the player with the highest number goes first. Play moves clockwise. On your turn roll the color die to see what color ball you'll be tapping. Then roll the number die to see what level you have to tap the ball from. The top level is level 1. If there are no balls of that color on that level, play passes to the next player. Winning is the same as #1.

Solitaire play:

Decide whether you want to use the color or number die. Keep track of how many balls you tap out before the tower collapses. Try to beat your score in the next game.

How to rebuild the tower:

Put the green cap in place, put the purple ring in first and put 14 balls into the unit. Place another ring into the unit and so on until the lid section is full. Attach the base section, lock lid by twisting the base and then turn over. Make sure WobBally is level and play the game again.
