

4 Card Game Rules

Samurai Swap

For 2 to 4 players

Object:

Collect the most sets of 4 matching cards.

Set Up:

Take out the Master Xandred card and set aside. It is not used in this game. Deal the rest of the cards to the players. Players look at their cards, but don't let opponents see them.

Playing:

Starting with the player who dealt the cards, players show any 4 card matches that they have been dealt, then place them face down in front of them. The dealer starts the round by asking any player if they have any card (a card that the player needs to make four-of-a-kind). If the asked player has that card, he/she must give any of those that they have to the player who asked. If the player who asked now has four-of-a-kind, they put that set in front of them, face down. If the asked player does NOT have any of the requested card, the turn ends and the player to the left now gets to ask any player for a card. The game continues until all cards have been collected, face down, in front of all the players.

Ending and Winning the Game:

The player with the most sets of cards wins.

Note: If a player runs out of cards that player is out of the game.

Power Ranger Pursuit

For 2 to 4 players

Object:

Be the player with the most matching pairs of cards.

Set Up:

This game uses the Master Xandred card. Mix the cards and deal them face down to all players.

Playing:

Players look at their cards and take out any pairs that they have been dealt. Show these pairs only to the other players then place them, face down, in front of you.

The youngest player now starts, taking any card—without looking!—from the player to his/her right. If it ends up matching any card in their hand, they show the other players the pair and place it face down in front of them. The next player clockwise now takes a card—without looking—from the player to his/her right and so on.

Ending and Winning the Game:

The game continues until one player has no cards left in their hand. That ends the game.

The player who has Master Xandred is out of the game. The other players count the number of pairs that they have and the player with the most pairs wins.

Megazord Match

For 2 to 4 players

Object:

Be the player with the most pairs at the end of the game.

Set Up:

Take out the Master Xandred card and set aside. Mix the cards, face down, and arrange them in a grid on the playing surface. Five rows of 6 cards and placing the remaining two at the bottom is one grid that works well.

Playing:

The youngest player starts by turning over any two cards. If they match, the player takes the matching cards, then takes another turn. As long as the player keeps finding matches, they keep taking turns. When a player turns over two cards that don't match, they are put back in their place, face down, and the player to the left takes their turn.

Ending and winning the game:

When all the pairs have been matched, players count up their cards and the player with the most cards wins.

Samurai Battle

For 2 to 4 players

Object:

Be the player to collect all the cards

Set Up:

Take out the Master Xandred card and set aside. It is not used in this game. Mix the rest of the cards and deal them, face down, to all players.

Playing:

At the count of "Samurai 1-2-3!" each player turns

over the top card on their deck and places it in front of them. As soon as any player sees that there is a matching pair of cards showing, they shout "Battle!". If correct, that player collects those cards (and any cards that may be under them from previous rounds) and places them at the bottom of his/her stack.

If a player shouts "Battle" and two of a kind are NOT showing, he/she gives each player a card from their stack to put at the bottom of their stacks. If two players shout "Battle" at the same time and two of a kind are showing, the cards are placed on the bottom of those player's stacks and the next round is played.

Ending and Winning the Game:

The first player to collect all the cards wins.
