

# HELLO KITTY® RED LIGHT, PINK LIGHT RULES

### **OBJECT**

Be the first player to reach the Finish space.

### CONTENTS

Game board, 4 rubber Hello Kitty movers, bow decoder, traffic light tile box, 15 traffic light tiles, 16 pink light tiles, sand timer.

### SET UP

Each player chooses a Hello Kitty mover and places it on the Start space.

Turn the traffic light tiles face down and mix them up; place them into the traffic signal box so the color circle sides face out, towards the box's holes.

Take the pink light tiles to an area across the room – or even to another room! Spread them out, bow side up.

### PLAYING

The youngest player goes first, then play moves to the left. On your turn, remove the front traffic light tile by taking it out and placing it behind the other tiles.

Your "light" will be seen on the tile that is now showing through the front of the box. Based on what color it is, this is what happens:

# • RED LIGHT:

You don't move on this turn; the player to the left now goes.

# • GREEN LIGHT:

Advance your mover the number of spaces shown on the green light. If the space you land on is occupied by another mover, move to the next open space. If the space your mover lands on has an arrow path, follow the arrow forward or backward.

# • PINK LIGHTS:

Turn the sand timer over and hurry to where the pink light tiles are. Take ONE tile and bring it back to the game board. Flip the tile over and use the Bow Decoder to reveal what number is on the underside of the tile. Advance your mover according to the same rules as in the green light section above (if the number revealed is zero, you do not advance your mover). If the sand timer has not run out, continue getting pink light tiles and advancing your mover. Once time is up, your turn is over.

NOTE: If all the pink light tiles have been taken, mix the used tiles up and put them back as during Set Up.

# **ENDING THE GAME**

The first player to reach or pass the Finish space wins!
