a **fun** with Chimp and **learn** with Zee game

Object:

To be the first player to collect the three carrots in your color.

Contents:

4 sneaky bunny playing pieces with furry tails, 1 farmer playing piece, 5 plastic bases for the bunny and farmer playing pieces, 12 carrots with colored ends, 1 farmer's field, 4 two-piece sneaky bunny paths, 2 dice (one number, one picture)

Set Up:

Place the farmer's field in the middle of the play area. Shuffle the carrots and put them into the slots of the field randomly, with the colored ends down. Use all the carrots even if there are only 2 or 3 players. Turn the field around a few times so that players don't remember where the carrots are.

The sneaky bunny paths come in two pieces and fit together like a jigsaw puzzle. Put each path together, making sure the arrow and the end space of each path are the same color. Place one sneaky bunny path per player, leading from one side of the farmer's field, with the colored stone next to the field, as shown on the package back. Place the farmer playing piece into a base and place him in the middle of his field.

Each player chooses a sneaky bunny playing piece, puts it into a base and places it on the arrow start space on his/her own path.

Playing:

Play starts with the youngest player and moves clockwise. The first player rolls the number dice and moves their bunny up their path towards the farmer's field.

When a player lands on the colored space next to the farmer's field, they get the chance to roll the picture dice and pick carrots from the field. Players do not need to roll the exact number to land on the colored space nearest the farmer's field.

Picture dice:

- **Farmer:** If a player rolls the farmer they can turn the farmer to face any other player. The chosen player must move their bunny back to the arrow start space on their bunny path.

- **Roll one carrot:** Pick up any carrot from the field and show the colored end to all the other players.
- **Roll two carrots:** Pick up two carrots and show the colored ends to everyone.
- **Making a match:** If the end of the carrot(s) matches the colored space on the player's bunny path, the player keeps the carrot(s) and moves their bunny back to their arrow start space until their next turn.
- **No match:** If a carrot picked from the field does not match the player's colored space, they must place the carrot back into the same slot on the field. The player leaves their bunny on the colored space next to the field until their next turn when they can roll the picture dice again.

Note: If a player picks up two carrots and one matches and one doesn't, the player returns the non-matching carrot to the field, and keeps the matching carrot. The player then moves their bunny back to their arrow start space until their next turn.

Ending and Winning the Game:

The first player to collect the three carrots that match the colored space on their path is the winner.
