

For 2 players  
Ages 6 and up

A cartoon illustration of Bugs Bunny holding a large white sign with both hands. He is looking towards the sign with a slight smile. The sign is the central focus of the page, containing the title of the game.

# WHO IS IT? Rules

## Object:

Be the first player to guess which character your opponent has chosen.

## Contents:

2 game consoles, 48 console cards, 48 “choose” cards.

## Set Up:

Each player takes a game console. Carefully separate the cards that are marked “Choose” from the sheet. Each player takes the deck that matches the color of their console. Carefully remove the console cards from the sheet and give the blue console player the cards that have the red backs and the red console player the cards that have the blue backs.

Each player will insert one console card into each of their 24 frames. Slowly slide each card in from the top of the frame so that it's captured in the front tabs of the frame. Be sure to place these cards so that the name “Looney Tunes” is face up and the character pictures are face down as shown on the package back.

**PLAYERS DO NOT HAVE TO PUT THE CHARACTERS IN THE SAME PLACE ON THEIR CONSOLE. IN FACT, IT'S A BETTER IDEA TO JUST RANDOMLY PLACE THEM INTO THE FRAMES.**

Place your scoring arrows at “O”.

## Playing:

Turn the “Choose” cards face down and mix them. Each player secretly chooses a card from their “Choose” deck and places it in the slot that's at the front of the console. (You may end up with the same card as your opponent). Both players put all of their 24 frames in the up position so

that your opponent can only see the "Looney Tunes" word side. The youngest player goes first by asking the other player any question that can be answered either "Yes" or "No". You are trying to ask questions that will help you guess what character the other player has chosen. You will use YOUR console to help you guess which card your opponent has.

For example, if you ask your opponent, "Does your character have a beak?" and they respond, "Yes", then YOU flip down the frames of all characters that DO NOT have a beak. Now you know that the character your opponent has is one of the characters still flipped up in your console.

The next player now asks a question to you and flips their frames down according to the answer you give. Players continue to take turns until a player wants to guess who their opponent has chosen.

### Guessing and Winning the Game:

A player may make a guess on any of their turns but BEFORE they ask a question. If their guess is correct, they win the game. If their guess is incorrect, the other player wins.

For multiple games, the winning player moves their scoring arrow to the "1" position and players "reset" their consoles so that all of the frames are face up. They remove the choose cards that are in their console slot, mix the cards up and choose new characters for the next round.
